15<sup>th</sup> December, 2011

Dear Steve,

On September 9<sup>th</sup>, 2011, the Wembley Road Lifestyle Gym employed Global Green ERI to deliver their cleaning and treatment service for the HVAC (Heating, Ventilation and Air-conditioning) Unit and the Split System Air-conditioners, utilised by the Gym for their heating and cooling requirements. Fan flow measurements for all units were recorded both before and after the treatment to assess the effectiveness of the treatment. Results of these measurements were as follows:

Unit	Airflow Improvement
HVAC Unit	31.6%
Office	35%
Ladies Gym	35%
Creche	23%
Tanning Room	10%
Cardio Room	20%

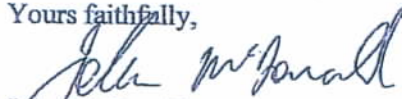

**The average improvement, across all split system air-conditionings units was 25.76%**

**The resulting energy improvements for our HVAC unit alone equated to a monthly saving of \$790.**

Three months following the treatment we are very happy to be able to report that a visual inspection of the external components of these units shows that the treatment is continuing to work extremely effectively at repelling dirt and debris, continuing to optimise the performance of these units.

The Gym is extremely happy with the results of your company's treatment as this has resulted in significant energy savings for the Gym in today's business environment of continually rising energy costs.

Yours faithfully,

John McDonald  
Manager
